Tlalpan. Mexico City, CDMX

Dear Laura Jiang,

I hope this message finds you well. First and foremost, I want to express my sincere gratitude for your email and the genuine interest you've shown in my project. It's heartening to know that InvestHK's services are free and that they are willing to provide support.

I am greatly pleased with the opportunity to explore how our collaboration could shape this project and take it to new heights. I am eager to discuss further details and explore how your organization and my project can work together.

Your proposal for a call to exchange additional information is highly valuable to me. While we are in different time zones, I want to assure you that I am willing to adjust my availability for this important dialogue. You can contact me directly through my personal mobile number: 4777035558.

Allow me to take this opportunity to share a bit more about the nature of my project. Currently, we are seeking to implement a technology based on human identification. This technology focuses on storing encrypted data in a database hosted in Hong Kong. As part of our focus on innovation, we are interested in developing an application using machine learning language, similar to the technology employed by GPT. Furthermore, we intend to host and manage the platform on a Chinese service cloud.

These are just the initial steps of an ambitious project, and I highly value the opportunity to have the support and expertise of InvestHK on this journey. I am eagerly looking forward to the possibility of discussing this project in greater depth and exploring how we can collaborate to achieve significant impact.

I appreciate your time and attention once again, and I am eager to hear from you. I look forward to your call to advance in this exciting collaboration opportunity.

Best regards,

(477) 7035558
